DEVICE DESIGN & DEVELOPMENT

We scale our design services to meet our customers' needs — from delivering discrete design work packages to managing complete device development projects in mechanical design, connectivity, electronic design, system miniaturization, as well as DFM and DFA for large volume manufacturing.

Located just 40km from Dublin, the site benefits from Ireland's status as a global hub of innovation within the medtech and life sciences industries. The region also provides access to an exceptionally well educated and highly trained workforce.
