

Kwidzyn, Poland

Established in 1991, and located 60 miles south of Gdańsk with easy access to rail, seaports and airports, Jabil Kwidzyn is the second largest Jabil facility in Europe. As a strategic European manufacturing site with 700,000 square feet of capacity, Jabil Kwidzyn has emerged as a key lower-cost manufacturing location to meet high mix, low volume and prototyping requirements. The Kwidzyn facility supports customers in key industries that include:

- Consumer electronics
- Industrial and home infrastructure
- Heavy industry
- Renewable energy, including the electricity and gas meters

Jabil Kwidzyn has a highly-skilled workforce of over 3,500 experienced and flexible employees and is the third largest employer in the Pomerania region.

Jabil Kwidzyn is an automation pioneer in Europe with extensive experience adapting into new markets.

Manufacturing Agility

The advantages of manufacturing in Kwidzyn are vast, offering customers a diverse suite of capabilities. Key benefits include:

- Dedicated import/export team with an authorized economic operator (AEO)
- Experts in project management with a dedicated project management office (PMO)
- Support in delivering customs and tax solutions
- Experience and flexibility adapting into new industries
- Automation pioneer partner
- Electricity and gas meter experience, including calibration and customization with key certifications
- Talent pool of more than 2.5 million people in proximity of 60 miles

These advantages make Jabil Kwidzyn an attractive lower-cost manufacturing location providing support throughout the entire product lifecycle.

Kwidzyn, Poland

Manufacturing Capabilities

- High mix, low-volume production
- Coating
- Potting
- Ultrasonic welding
- Clean room (ISO 7, Class 10K)
- Direct fulfillment and box build
- RF and wireless manufacturing
- Metal stamping and painting
- Restricted access manufacturing areas
- Optics and active alignment

Automation Capabilities

- IE robots implementation
- Collaboration robots
- Automatic career back transport
- Automatic test
- Low-cost automation

Testing Capabilities

- Automated inspection system (AOI)
- Environmental stress screening (ESS)
- Design for testability (DFT)
- Local Global Operations Services (GOS) test development
- All standard test platforms
- Failure analysis lab

Certifications

- ISO 9001 – Quality Management Systems
- ISO 14001 – Environmental
- ISO 27001 – Security
- OHSAS 18001
- ATEX
